

Emerging areas of work

Potential emergence of new job roles

In addition to job stacking, megatrends and technology adoption have also spurred the emergence of **new job roles** in the sector. A significant level of reskilling is required for existing job roles in the sector to take up the following emerging job roles, where specific diplomas/degrees or further studies may be necessary. Companies might also need to hire talent from outside of the sector to fill these roles.

Sustainability Specialist

Job Description

Drive organisation's sustainability agenda and is the expert regarding all sustainability related market trends and information.

Key Responsibilities

- Propose and evaluate effectiveness of sustainability initiatives, considering factors such as cost-effectiveness, technical feasibility, and acceptance.
- Collaborate with functional heads to ideate and propose sustainable food production initiatives such as food waste management and the sourcing of sustainable suppliers.
- Partner with vendors, suppliers, and like-minded businesses that are committed to green initiatives.
