In the next **1 - 3 years...**

MEDIUM degree of change in tasks

The job will potentially require **MODERATE JOB REDESIGN**

A fair proportion of the job tasks will be substituted by technology, with human intervention required for high value-adding tasks as against routine, repetitive tasks

Responsibilities of the role today

The Reservations Executive / Reservations Supervisor is responsible for **supervising the operations of the department in selling rooms and managing room inventory to maximise sales**. He/She ensures that all guest requests, concerns and feedback relating to rooms reservations are addressed in a timely and professional manner and collaborates with relevant departments on **booking requirements** and **special guest requests** to provide a **seamless guest experience**.

Responsibilities of the role in the future

Moving forward, this role will still be responsible for building and maintaining guest relationships in the hotel. **High level of social interaction** will still be required for the job holder to **identify new business opportunities for targeted upselling and grow relationships with key accounts**. The job holder will also leverage technologies such as **data and analytics** to play a **larger role in customer relationship building** and **service quality improvement**.

Critical Work Function

Job tasks today

Job tasks within the next 3 years

Manage reservation requests	Assist guests on enquiries and escalated concerns, and provide recommendations on rooms or packages, while monitoring guest satisfaction levels		<ul style="list-style-type: none">• Virtual chatbots enabled by AI and ML will address basic customer queries and enable round-the-clock resolution of customer queries.• Smart Customer Relationship Management (CRM) systems provide insights on guest preferences and purchase patterns, allowing the job holder to provide personalised recommendations on room packages.
Manage reservation operations	Check records, data entries, and transactions in the PMS to ensure data and documentation accuracy, and execute risk response activities to manage system downtime		<ul style="list-style-type: none">• Robotic Process Automation (RPA) automates the input of records and reservation data in the Property Management System (PMS) and conducts auto cross checks, therefore increasing efficiency and accuracy. Some human judgement may still be required for oversight and managing quality of output.
	Collaborate with relevant departments on group allocations and reservations and special guests' requests		<ul style="list-style-type: none">• Collaborate with relevant departments on group allocations and reservations and special guests' requests.
Manage room inventory	Verify room inventory and availability of room types and rates on booking platforms		<ul style="list-style-type: none">• Central Reservation System (CRS) tracks real-time updates on room inventory and availability of room types and rates on multiple booking platforms.• The job holder may still be required to verify room availability and inventory.
	Monitor room sales, booking pick-up, and occupancy rates for management reporting and forecasting purposes		<ul style="list-style-type: none">• Central Reservation System (CRS) tracks real-time updates on room sales and booking pick-up rates for management reporting• Data analytics and visualisation tools support the analysis of seasonal and historical trends, allowing the job holder to make informed reservation forecasts for more accurate analysis and planning.

Critical Work Function	Job tasks today	Job tasks within the next 3 years
Manage human resources, finance and continuous improvement	Implement innovation, productivity and technology enhancement plans to improve reservation operations and service delivery	<ul style="list-style-type: none">Implement innovation, productivity and technology enhancement plans to improve reservation operations and service delivery.
	Manage and improve team service performance by facilitating opportunities for knowledge and information sharing, implementing training plans and coaching team members	<ul style="list-style-type: none">Manage and improve team service performance by facilitating opportunities for knowledge and information sharing, implementing training plans and coaching team members.

Redesign possibilities	
Vertical stacking	<ul style="list-style-type: none">Stacked with <i>Reservations Officer / Reservations Agent</i> and enlarged to become Reservations Specialist.
