

# Future Role – Integrated Business Planner

Integrated Business Planner

## Job Description

The Integrated Business Planning Manager is tasked to deliver successful execution of plan alignment across multiple functions, achieving organizational commitments

## Key Responsibilities

- To develop a holistic plan to optimise the production capacity and minimise cost
- To align operating plans/forecasts across multiple functions to optimize time, team, and dollar resources in support of business objectives while ensuring accountability to organizational commitments.
- To influence, direct, engage, coach and mentor stakeholders to ensure an environment where various functional perspectives are understood and ultimately, driven towards an aligned direction.
- To build cross functional scenario planning with focus on risks, opportunities and mitigation plans
- To synthesize and articulate how business trends impact cross functional teams using fact-based insights to influence change which enhances profitable and sustainable growth

## Skills & Other Requirements

- **Business Analysis Certification** - to approach scenarios methodically with fact-based insights, with problem-solving capability to solve complex issues
- **Data Analytics** - to sift through data, identify critical information, analyze, synthesize, develop hypothesis and make recommendations
- **Planning Software** – i.e., monday.com
- **Strong fundamental understanding** of broad operational, supply-chain planning, financial and marketplace concepts

## Key attributes:

- Strong team player
- Ability to effectively communicate, present, influence and collaborate with broad cross functional partners
- Ability to work in a matrix environment with multiple business functions, levels and stakeholders

## Typical Education Requirements

Bachelor’s degree in Business, Finance, Sales, Supply Chain or a related field

## Typical Experience Requirements

8 years or more
