

Examples of Supply Chain Management Activities in Singapore (Non-Exhaustive)

S/No	Company	Details
1.	Agilent Technologies	<p>Agilent Technologies Inc, a global leader in the life sciences, diagnostics, and applied chemical markets, has been investing in Singapore for more than 20 years. As a trusted life science and diagnostics industry partner with over 800 employees, Agilent Singapore designs, engineers, manufacturers and maintains life sciences and bio-analytical instruments across the Asia Pacific, and provides asset management and through-life support to customers and academia.</p> <p>Agilent Singapore's Asia Pacific Regional Hub hosts a headquarter for global supply chain at Yishun and a 75,000 square feet Regional Logistics Centre (RLC-Asia) warehouse at Jurong West, serving a diverse customer base and shipping innovative technologies to more than 50 countries worldwide. Over the years, the company has doubled its capacity to support Agilent's growing product portfolio and to better serve customers globally, while improving speed, quality and productivity.</p> <p>As part of Agilent Singapore's commitment to developing local talent, its global supply chain is headed by two Singaporean executive leaders - Vice President of Global Logistics Lim Chee Beng, and Vice President of Global Procurement Annie Tham - delivering on a collective strategic vision to optimise logistics operation and enhance customer experience through a more robust and flexible supply-chain network.</p>

2.	Dyson	<p>From its humble beginnings in Chippenham, United Kingdom, where Dyson used to produce 100 machines a day, Dyson's manufacturing and supply chain operations is today an advanced and global operations spanning key markets such as Singapore, Malaysia, the Philippines, and Mexico. Dyson Chief Supply Chain Officer leads the company's global operations in advanced manufacturing and supply chain from the company's iconic global headquarters, St James Power Station, in Singapore. With a dedicated team overseeing large-scale production, Dyson has championed the diversification of its manufacturing base worldwide to exceed the needs of Dyson owners in over 80 markets.</p> <p>Singapore is key to Dyson's global ambitions and successes. Its patented Dyson Hyperdymium™ motors, which sit at the heart of many pioneering Dyson machines, including the cord-free vacuum, the Dyson Airblade™ hand dryer, and the Dyson Supersonic™ hair dryer, are made locally at the Singapore Advanced Manufacturing Facility since 2012. Dyson is also expanding its advanced manufacturing footprint in Singapore with its first ever proprietary new technology battery plant. Representing the most significant investment in advanced manufacturing in Dyson's history, the new state-of-the-art factory will bring Dyson's battery technology to market by 2025. Incorporating innovative materials and Industry 4.0 processes, the batteries will be assembled in a smart, digitally enabled environment, much like the rest of Dyson's global manufacturing facilities.</p>
3.	Henkel	<p>Henkel has operated in Singapore since 1983. In August 2016, Henkel set up its new global supply chain hub in Singapore, as part of its push to merge its supply chains around the world. The Singapore hub, together with Amsterdam, standardises and consolidates Henkel's purchasing, production and logistics processes across two business units – Adhesive Technologies and Consumer Brands.</p> <p>Henkel continues to build up, in Singapore, a digital ecosystem of established standards with large vendors. In 2021, Henkel was part of six founding members for the Together for Sustainability (TfS) team in Singapore, which aims to drive sustainable supply chains in the chemical industries in Singapore, Southeast Asia and beyond. In addition, its digital team here is tasked with identifying promising start-ups with digital and technological expertise, and partners universities on joint programmes to accelerate digitalisation within Henkel.</p>
4.	Jabil	<p>Jabil is a manufacturing solutions provider with over 250,000 employees across 100 locations in 30 countries. Headquartered in Florida, United States of America, the world's leading brands rely on Jabil's unmatched breadth and depth of end-market experience, technical and design capabilities, manufacturing know-how, supply chain insights, and global product management expertise.</p> <p>Jabil Singapore, established in 2002, employs more than 700+ employees and serves as Jabil's headquarters in Asia. Singapore is also home to Jabil's Supply Chain IHQ in Asia, which oversees the full spectrum of supply chain functions including commodity management, supplier development, advanced planning, logistics, project management and</p>

		<p>technical sourcing. Over a 10-year period, the number of Jabil's supply chain management professionals in Singapore has grown 200%.</p> <p>Jabil Singapore is well-positioned to drive supply chain intelligence, visibility and accelerate time-to-market to enable the best strategies, innovation and design for a superior financial performance and customer experience. Jabil Singapore is also connected to the world through a strong network of international trade agreements, having achieved Secured Trade Partnership (STP) and Customs Trade Partnership Against Terrorism (C-TPAT) status, moving and doing business seamlessly with well-developed digital, transport and trade networks that connect all corners of the world. The team has also worked with and qualified a few local SMEs as its partners in key commodities.</p>
5.	Samsonite	<p>Samsonite, a leader in the global lifestyle bag industry and the world's best-known and largest travel luggage company, established a brand development and sourcing hub in Singapore as part of a global restructuring initiative to enhance alignment of the Company's product development, brand management and supply chain operations across Asia in 2021. The establishment of the brand development and sourcing hub builds on Samsonite's 25-year history in Singapore.</p> <p>The establishment of this hub will enable the Company to design products closer to market while continuing to lead the industry in product development, innovation, and sustainability for several key brands, including Samsonite and American Tourister. Samsonite will also leverage this hub to manage sourcing for Asia and the Middle East, while supporting and administering sourcing for North America and Latin America. It brings with it the opportunity to transfer knowledge and information transfers, resource development. The team in the hub and its retail operations has growth rapidly from 15 staff to 85 staff. The hub continues to grow its headcount as it takes on new opportunities in Asia, America, and Latin America.</p> <p>The SCM operations cover demand and supply planning, logistics planning, sourcing and product development, global supply chain coordination and global social compliance. These operations have grown from four, to a team of 11 in the Singapore office. These operations account for more than 60% of Samsonite's global supply.</p>
6.	Schneider Electric	<p>Schneider Electric is a global leader in digital energy management and automation. In 2011, the organization set up a global distribution centre in Singapore, along with its global logistics and network design functions. As one of Schneider's three global supply chain hubs, Singapore also houses several global capabilities for the company, including logistics and planning, and end-to-end control towers.</p> <p>In 2016, Schneider began their multi-year digital transformation journey to achieve end-to-end supply chain visibility, with the establishment of its first control tower in Singapore as a pilot programme.</p>

		<p>Most recently in 2022, Schneider has invested S\$110 million in its carbon-neutral Hub Asia distribution centre which serves as an anchor point in the development of the wider Tuas South industrial area. Spanning 21,000 square meters, the new warehouse will see a 30% increase in operation capacity compared to its previous site, and support operations for an annual revenue totally €2 billion for Schneider.</p> <p>Most recently in 2022, Schneider has invested S\$110 million in its carbon-neutral Hub Asia distribution centre which serves as an anchor point in the development of the wider Tuas South industrial area. 7.	VF Corporation	<p>VF Corporation is one of the world's largest apparel, footwear and accessories companies connecting people to the lifestyles, activities, and experiences they cherish through a family of iconic outdoor, active and workwear brands including Vans, The North Face, Timberland and Dickies. The VF Product Supply Hub, located in Singapore, oversees some 70 per cent of VF's global production efforts.</p> <p>With a complex supply chain spanning some 40 countries, VF seeks to enable innovation and enhance the agility of this network through investing in automation and leveraging technology.</p> <p>As part of transformation plans for the region, VF saw opportunities to create a hyper-digital supply chain based out of Singapore, relocating its Asia supply hub here between 2021 and 2022.</p> <p>This strategic move taps into Singapore's world-class capabilities in data and analytics to increase VF's speed and agility in how they make, source and move products around the world. It also enhances integration across VF's global supply chain network, which includes key hubs in Europe and the Americas.</p> <p>To ensure a pipeline of talent for its regional businesses, the company has also set up a VF Academy for Supply Chain in Singapore to provide structured in-house training for its associates.</p>
